Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Applicant's election without traverse of claims 1-5 in the reply filed on March 14, 2006 is acknowledged. Claim 6 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 14, 2006.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been received.

Drawings

Figures 10-11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The functional recitation of "slidably in directions of being brought into contact with

Art Unit: 3721

and separated from” and “urged in a direction of being engaged” are indefinite in that the scope of the claimed structure that applicant considers to be the invention is unclear. The claims are written in a narrative format and therefore it is difficult to determine what is the scope of the claimed invention. The claim should be rewritten positively reciting the structure of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Magnusson (5,460,313).

Magnusson discloses an electric stapler with a magazine portion for containing a number of staples; a staple striking portion; a motor; a table 12, supported by a main body frame 11 of the electric stapler, and including clincher mechanism; a wing piece 15 formed at the table; locking means formed between the wing piece of the table and the main body frame 11, wherein a pivoting force in an opening direction of the table is hampered by engaging the locking means with the wing piece of the table as shown un col. 5; 53-60, also see the Abstract (claim 1); a lock plate 36 and a locking pin 39 (claim 2); and an operating piece 40 formed at the lock plate 36, an operating cam 35, and a spring 41 (claim 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Magnusson (5,460,313) in view of Kanai (5,836,502).

Magnusson discloses a locking mechanism substantially as claimed as discussed above, but does not disclose wherein the locking means comprises an eccentric cam supported by the main body frame and engageable with the wing piece. However, Kanai shows an eccentric cam 10 supported by a main body and engageable with a wing piece 11 for the purpose of actuating the wing piece such that performing a staple driving operation and thereafter stopping the actuation of the wing piece in an opening direction during the staple driving operation as shown in col. 15; 64-67 and col. 16; 1-10. It would have been obvious to one skilled in the art to use an eccentric cam on the locking mechanism of Magnusson's as taught by Kanai to properly lock the wing piece in an opening direction during a staple driving operation.

Kanai also teaches the concept of engaging teeth 54,55 and locking teeth at 52 (claim 5)

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamanoi, Udagawa, Manabe, Yagi, Mochizuki'579, Kitamura, Yoshie, Mochizuki'304, Mochizuki'094, and Mochizuki'524 are cited to show related inventions.
